

SYSTEM AND METHOD FOR RESOURCE LOCATOR USING QUERIES

ABSTRACT

Disclosed is an apparatus, including a memory for receiving a resource descriptor, the
resource descriptor including a uniform resource identifier (URI) for a particular resource and
an associated search query for locating the particular resource; and a controller, coupled to the
memory, for initiating an access process for the particular resource using the resource
descriptor. A method of retrieving a particular resource, comprising: parsing a resource
descriptor into a uniform resource identifier (URI) for the particular resource and an associated
search query for locating the particular resource; and initiating an access process for the
particular resource using the URI and the associated search query.
